

Porzyme tp100(HP) - Quick Reference Guide

| | |
|--------------------------------|--|
| Application | For young pigs, from weaning to 30kg weight, fed diets containing vegetable protein and based on corn, broken rice, wheat or sorghum and their by-products. |
| Economic benefits | <ul style="list-style-type: none"> • Lower feed costs • More uniform pigs • Higher quality end product from increased lean meat percentage • Fewer digestive disorders • Contributing to food safety • Proven value in antibiotic growth promoter free nutrition • Improved environment |
| Recommendations for use | <p>Add Porzyme to the standard piglet feed formulation To improve piglet growth and feed conversion, add Porzyme to the standard piglet feed formulation.</p> <p>Reformulation For reduced feed costs and maintained piglet growth and feed conversion.</p> <p>Option 1 Maintain the energy and digestible amino acid specification of the feed. Reduce the inclusion of some high cost protein ingredients (e.g. milk products and fishmeal) and increase the inclusion of lower cost vegetable protein (e.g. soybean meal).</p> <p>Option 2</p> <ul style="list-style-type: none"> • Energy - reduce the digestible energy (DE) or metabolisable energy (ME) of the total feed by up to 2.5% or reduce the net energy (NE) of the total feed by up to 3.5% • Amino acids - reduce the crude protein and digestible amino acids of the total feed by up to 2.5% |
| Inclusion rate | <p>Granular Porzyme tp100(HP) 1 kg per tonne (0.1%) of finished feed, included either directly or via a premix.</p> <p>Liquid Porzyme tp100(HP) For advice on this product please contact Danisco Animal Nutrition or your local distributor.</p> |
| Storage stability | <p>Granular Porzyme tp100(HP) 12 months when stored in original packaging at < 22°C (< 72°F). Store in dry conditions. 3 months when included in a vitamin/mineral premix and stored at < 22°C (< 72°F). Store in dry conditions.</p> |
| Processing stability | <p>Granular Porzyme tp100(HP) For optimum bioefficacy, do not exceed conditioning and pelleting temperatures of 85°C (185°F).</p> |
| Packaging | <p>Granular Porzyme tp100(HP) 25kg multi-wall paper bags or 1000kg bulk (tote) bags.</p> |
| Related services | <ul style="list-style-type: none"> • Engineering support - expert advice on the best choice of system for applying liquid Porzyme products onto pelleted feed • Enzyme in-feed laboratory analysis - confirms that Porzyme has been accurately included in the feed for maximum profit |
